### ABOUT THE CONFERENCE

Language and Literature are two sides of the same coin in teaching and learning process. English education in India has largely been dependent on the teaching of literature. It is only in the recent years that there has been a shift in emphasis from teaching literature to teaching language. The relation between Literature and English Language Teaching has been rather a difficult union throughout all these years. At some point while English Language Teaching adopted a structural approach, literature has been taught as a separate subject. Literature is used in English Language Teaching to broaden learners' horizons by giving them knowledge of the classics of literature, to enhance general cultural awareness, stimulate creative and literary imagination and nurture appreciation of literature.

An effectively expressed attitude, sentiment, description and detail within poetry and prose result in new waves in language and literature. This conference aims to bring educators and researchers around the world to critically examine the scope of teaching literature and language as a nexus of inter relationships between individuals, society and culture and how to discuss language through practices and innovations has become the mirror of society.
